

STEP ONE.....

**Buy two shirts the same size and color.
Cut the first one here,**

**making sure the shirt
is flat and your cut is straight.**

STEP TWO

Cut second shirt here,

**making it shorter or longer
depending on the length you wish.**

STEP THREE

**putting right sides together
matching edges and seams like this,**

sew together the two pieces.

**you need to leave about 1/2" of space
from edge
and keep your sewing in a consistently
straight line.**

STEP FOUR

After sewing two sides together turn shirt over to the right side. Tuck the edge you just completed down and sew it down from the right side, so as to have a more neat appearance like this.

This is the edge that you are to tuck down and sew from top.

This is what your edge should look like when done.

Here is the completed tunic.
